The Wine Cellar at the Lambertville Station

Tasting Discussion

The Wine Cellar at the Lambertville Station

Presenter: Alan Levinson | Taste of Spain Wine Pairing

Spanish wine is deeply influenced by the country's varied climates and rugged geography. From cooler, Atlantic-influenced regions in the north to hot, dry Mediterranean and inland areas, growing conditions shape how grapes develop structure, ripeness, and acidity. These regional contrasts result in wines that reflect both resilience to climate and a strong sense of place.

Course 1
